MULTIMIN[®]

Injection for Cattle

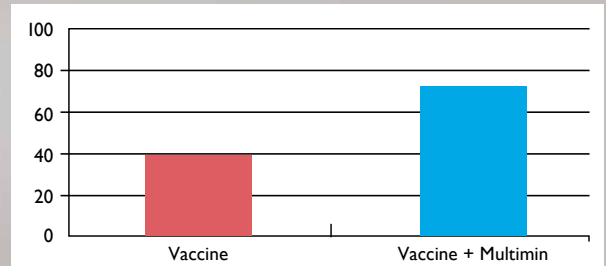

**OPEN THE WINDOW OF
PRODUCTIVITY FOR YOUNG STOCK**

NEW

Now in a convenient 200mL pack!

After 10 days, over 70% of Multimin treated animals had protection from vaccination, compared to under 40% of untreated animals.

Injectable trace minerals and young stock health. What's the link?

Marking and weaning are stressful times for calves. This stress affects the immune system and vaccine efficacy. Research from the University of Florida¹ and local trials with one of Australia's leading vaccines², have found that cattle treated with Multimin, at the same time as vaccination, produced a significantly stronger and faster vaccine response compared to untreated animals.
