# MULTIMIN<sup>®</sup>

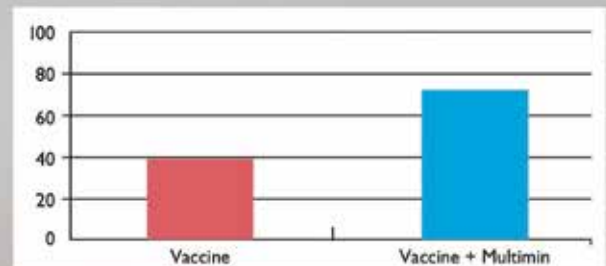

Injection for Cattle

**OPEN THE WINDOW OF  
PRODUCTIVITY FOR YOUNG STOCK**

After 10 days, over 70% of Multimin treated animals had protection from vaccination, compared to under 40% of untreated animals.

**Injectable trace minerals and young stock health. What's the link?**

Marking and weaning are stressful times for calves. This stress affects the immune system and vaccine efficacy. Research from the University of Florida<sup>1</sup> and local trials with one of Australia's leading vaccines<sup>2</sup>, have found that cattle treated with Multimin, at the same time as vaccination, produced a significantly stronger and faster vaccine response compared to untreated animals.

**Now in a convenient 200mL pack!**
